### **DETAILED ACTION**

1. Receipt is acknowledged of applicant's argument/remarks filed on February 11, 2001, claims 11, 13- 20 are pending and an action on the merits is as follows.

Applicant's arguments with respect to amended claims 11-20 have been fully considered but are moot in view of Election/Restrictions action. Applicant has amended **claims 11, 13, 18** and cancelled **claims 1-10**.

### **Election/Restrictions**

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species 1: Figures 1 drawn to an actual value of a control variable, in which the value of the parameter is assigned by means of a characteristic curve.
- Species 2: Figures 2 drawn to an actual value of a control variable, in which the rate of change of the total theoretical value is additionally considered.
- Species 3: Figures 3 drawn to an actual value of a control variable, in which the value of the parameter is determined by means of a parameter estimation process.
- Species 4: Figures 4 drawn to an actual value of a control variable, in which the value of the parameter is determined by means of an inverse model.

- Species 5: Figures 5 drawn to an actual value of a control variable, in which the value of the parameter is determined by means of a parameter estimation process.
- Species 6: Figures 6 drawn to an actual value of a control variable, in which the value of the parameter is determined by means of a model.
- Species 7: Figures 7 drawn to an actual value of a control variable of yet another form of implementation of the process.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner where it is necessary to search for one of the inventions in a manner that is not likely to result in finding art pertinent to the other invention (e.g. searching different classes/subclasses or electronic resources, or employing different search queries).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 11 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claim to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by fee required under 37 CFR 1.17(i).
